roulette is one of the challenging and strategic casino betting games where we keep limited stakes for betting to get profit depending upon the strategy we use the percentage of winning would be up to 98 approximately if proper mathematical approach and strategy used with the numbers or sections on the board obviously if we are bit careless and lazy to miss any sequence strategy leads to minimum or maximum loss so the roulette must be played very carefully with stable mind and quite intelligent approach only for limited time in a day or week keep in mind that if we play long hours continuously roulette wins so keep the play minimum in a day though the roulette game comes under gambling it is like a chess board where you will win if properly played with advanced techniques european and american roulette games are very popular and we choose european roulette example throughout this book to understand well and increase winning chance european roulette has single zero 0 and american roulette has double 0 00 s where almost playing style is same with approaches there are many different types of casinos are available like direct casinos in club where really you can play with the people and second approach is to play online let us focus online casinos for our games where we play with available online casino vendors also try to learn the following strategies methods to play with roulette from basics to advance levels martingale roulette system reverse martingale d alembert roulette system reverse d alembert fibonacci roulette system reverse fibonacci labouchere roulette system cover the table flat betting oscar s grind red and black strategies dozens and columns james bond roulette system fobt system please search sites like roulettestrategy net or casinosmash com where you can learn some theory and approaches to play roulette at best this book has some secrets of winning roulette with 1 2 3 4 5 6 8 9 12 and 18 numbers strategies online if proper approach is being followed including logging off and logging in again after every win some of the methods given in this book are really a treasure and out of thousands of iterations with the profit of more than 5 to 10 everyday this winning returns are possible in a month or so but if people are greedy they may loose more than what they invested so daily if you limit your profit you will have reasonable bulk returns like 30 to 50 every month also no outside betting given like red black odd even first 18 last 18 etc as this may swallow your stake without dragging much let us dive in to the topics happy casino playing
