this book provides a valuable resource by addressing the most pressing issues facing cyber security from both a national and global perspective provided by publisher

inter organizational cooperation has become increasingly important in firms strategies this book provides a brief introduction to the theory of cooperation and the foundations of logistics service management and supply chain management the main focus of the book however is to examine the use of sap systems for supporting inter organizational cooperation in particular supply chain coordination the authors present both well known logistics solutions e g edi and the implementations of state of the art supply chain solutions using sap systems such as mysap com sap apo sap les sap bbp sap business information warehouse and internet applications in particular the book contains a number of case studies which show the application of the systems in practice

this textbook for master programs in economics offers a comprehensive overview of microeconomics it employs a carefully graded approach where basic game theory concepts are already explained within the simpler decision framework the unavoidable mathematical content is supplied when needed not in an appendix the book covers a lot of ground from decision theory to game theory from bargaining to auction theory from household theory to oligopoly theory and from the theory of general equilibrium to regulation theory additionally cooperative game theory is introduced this textbook has been recommended and developed for university courses in germany austria and switzerland

interest in power systems economics is gaining momentum with the recent power supply shortages in america and the rising cost of fossil fuels the involvement of independent power generators brokers and distributors has changed the way in which power systems operate kirschen and strbac use a combination of traditional engineering techniques and fundamental economics to address the long term problems of power system development in a competitive environment power system engineers operators planners and policy makers working in the deregulated environment will value this practical guide also of great interest to postgraduate and advanced undergraduate students in electrical and power engineering outlines the principles of competitive electricity markets alongside the operation and development of the

supporting transmission and distribution networks applies basic economic principles to power system operating and planning written by recognised experts in the field for further information and to register for the solutions manual visit wiley.com/go/powersystemeconomics

this book contains essays and revision notes for microeconomics at the undergraduate level this book includes the following topics utility curves perfect competition vs monopoly oligopoly collusion monopolistic competition price discrimination x efficiency why do firms exist negative externalities positive externalities public goods adverse selection general equilibrium efficiency wages minimum wages and unemployment arrow pratt risk aversion

a world list of books in the english language

in this relatively short survey we present the core elements of the microeconomic analysis of insurance markets at a level suitable for senior undergraduate and graduate economics students the aim of this analysis is to understand how insurance markets work what their fundamental economic functions are and how efficiently they may be expected to carry these out

resource economics engages students and practitioners in natural resource and environmental issues from both local and global standpoints the fourth edition of this approachable but rigorous text provides a new focus on risk and uncertainty as well as new applications that address the effect of new energy technologies on scarcity and climate change mitigation and adaptation while preserving and systematically updating the approach and key features that drew many thousands of readers to the first three editions

the book provides a panoramic approach to social exclusion with emphasis on structural causes education health accidents and on short term causes connected with the crisis which started in 2008 the picture emerging based on econometric analysis is that the crisis has widened the risk of social exclusion from the structural groups like disabled people and formerly convicted people to other groups like the young unemployed low skilled workers and immigrants

in terms of income poverty health unemployment transition between occupational statuses participation leading to a widening of socio economic duality it has also been stressed the relevance of definitions of socio economic outcomes for the evaluation of the crisis and their consequences to define interventions to fight socio economic effects of the economic downturn the adequacy of welfare policies to cope with social exclusion especially during a crisis has been called into question

a very timely treatment of one of mankind s most important topics tyler cowen george mason university us this important and highly original book explores the application of economics to the subject of hate via such diverse topics as war terrorism road rage witchcraft mania marriage and divorce and bullying and harassment as yet there is no overall economic approach to hate samuel cameron pioneers this work by using standard neo classical economics concepts of the utility maximizing consumer and the entrepreneur he examines emotions as a form of personal capital and hate as a form of negative social capital and investigates the idea of a modular matrix of hatred as the appropriate means of examining the subject the likely form and scope of future effects of hate on government policy are also discussed seeking to explore the dimensions of hate as a commodity from a wider economic perspective this exceptional book will prove a fascinating read for those with an interest in the economic value of hatred in particular and the economics of the unusual more generally
